

WHAT ON EARTH HAVE WE DONE?

Protecting our planet is not just down to governments or schoolchildren, we all have a part to play. At Intergas we are committed to continually finding ways of making our boilers cleaner and more energy efficient, and now we have developed the lowest NOx domestic boilers on the planet.

Our new Xtreme and Xclusive boilers reduce NOx emissions to as little as 17.60mg/kWh*, and the Xtreme, with its built-in passive flue gas heat recovery unit, reduces CO₂ emissions still further.

When 14% of harmful emissions come from our homes** we see it as our duty to do something about that.

* NOx emissions from Xtreme and Xclusive boilers only emit between 17.06-20.33mg/kWh, depending on the model.
